

Green Hydrogen Management System - Expected Output

The program displays a console menu:

1. Enter Renewable Energy
2. Calculate Hydrogen
3. Store Hydrogen
4. Transport Hydrogen
5. Dashboard
6. Report
7. Exit

Sample Run:

Enter Renewable Energy: 500 kWh

Calculated Hydrogen: 10.00 kg (using 50 kWh per kg estimate)

Store Hydrogen: 8 kg

Transport Hydrogen: 5 kg

Dashboard:

Renewable Energy : 500.00 kWh

Hydrogen Produced: 10.00 kg

Hydrogen Stored : 3.00 kg

Hydrogen Transported: 5.00 kg

Report:

Estimated CO2 Saved: 100.00 kg
